

SADAT TANZIM

tanzims@uwindsor.ca — (519) 919-3648 — in/sadattanzim01 — github.com/sadattanzim01

EDUCATION

University of Windsor

Bachelor of Computer Science, Honours (Minor in Mathematics)

Windsor, ON

Sept 2024 – Present

EXPERIENCE

Glendor

Software Engineering Intern

Windsor, ON

Sept 2026 – Present

- Contributing to a federated learning initiative applying privacy-preserving machine learning to model training
- Reviewing federated averaging literature and configuring Python environments for distributed training research

Simcoe Cosmetic Clinic

Web Developer & SEO Analyst

Barrie, ON

May 2026 – July 2026

- Developed Python monitoring scripts auditing 10+ live web pages, detecting broken links and metadata defects
- Optimized 14+ service pages with structured schema markup and metadata, improving search click-through rate
- Migrated a React and Vite client portal into version control and recommended a higher-performance cloud server
- Flagged exposed API credentials in a client CRM environment file and escalated remediation to stakeholders

Formula Electric

Embedded Software and Controls Team Member

Windsor, ON

Oct 2025 – Present

- Benchmarked Qt and LVGL embedded C/C++ display frameworks and resolved display-stack integration defects
- Recommended a framework delivering 60 FPS rendering and 30% faster builds, projecting \$2.6K–\$3.6K in savings
- Validated GPU-accelerated rendering on Raspberry Pi and documented trade-offs for cross-functional review

University of Windsor AI Club

Project Coordinator

Windsor, ON

Feb 2025 – Present

- Designed and co-led a PyTorch workshop for 60 students, building a tabular classification model to 92% accuracy
- Mentored beginners in Python, Git, and documentation practices, translating ML concepts for non-specialists

PROJECTS

PR-Pilot

- Built an agentic AI code reviewer ingesting GitHub webhooks and posting pull request feedback in under 20 seconds
- Architected a full-stack app with RESTful APIs and a PostgreSQL backend, deployed via CI/CD to Vercel
- Integrated GitHub OAuth 2.0 and the Octokit SDK to authenticate users and publish AI-generated review comments

MyAdvice

- Led a 4-person Agile/Scrum team to deliver a student advising system, earning a perfect score
- Designed object-oriented service and data layers in Spring Boot for booking, scheduling, and transcript modules
- Deployed to Microsoft Azure App Service and validated REST endpoints across modules with Postman

DevLENS

- Built a GitHub analytics dashboard with a React frontend, Node.js/Express backend, and GitHub OAuth 2.0 login
- Developed a Python and Flask microservice using scikit-learn to classify developer activity across 100+ repositories
- Implemented MySQL caching and Chart.js visualizations, cutting redundant API calls and surfacing usage insights

ClassifyFlow

- Engineered an LLM pipeline classifying 51 maintenance requests by urgency and trade via the Claude API
- Designed prompt logic and regex parsing to extract schema-aligned JSON from unstructured natural-language input
- Automated intake and reporting via the Google Sheets API, replacing manual triage entirely

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, SQL, C, C++, PHP, HTML5, CSS3

Frameworks: React.js, Node.js, Express.js, Spring Boot, Flask, PyTorch, scikit-learn, Bootstrap, jQuery

Cloud and Devops: Microsoft Azure, Google Cloud Platform (GCP), Firebase, Docker, CI/CD, Vercel, Railway

Databases & Tools: PostgreSQL, MySQL, Git, GitHub, Postman, Linux, n8n
